PROFESSIONAL EXPERIENCE

Frontend Developer | 02/23– current

DanZeeTech (Denmark)

- Develop cross-platform mobile applications for iOS and Android using **React Native**.
- Build dynamic, responsive websites and web applications with **React.js** and **Next.js**.
- Implement state management solutions (e.g., Redux) for both mobile and web applications.
- Ensure high code quality and follow coding best practices.

React Native Developer | 02/2023 – 11/2023 (REMOTE)

Minders (Denmark)

- Develop and maintain a responsive, intuitive user interface.
- Collaborate with designers, backend developers, and product teams to align features with project goals.

EDUCATION

KFUEIT (Khawaja Fareed Engineering University and Information Technology, RYK)

- Bachelors in Software Engineering
- GPA 3.18

ACHIVEMENTS & CERTIFICATIONS

MERN Stack (Mercury Souls)

Achieved 1st position among peers, earning recognition and prizes. Developed a full-stack application for the final project using **React.js** and **Node.js**. Gained hands-on experience in **MongoDB**, **Express.js**, **React.js**, and **Node.js**, mastering best practices in full-stack development

PROJECTS

LEARNIFY

Learnify is a Denmark-based platform designed to enhance employee engagement, enabling users to manage tasks, send buddy requests, participate in group chats, and monitor their activities and exercises.

- PlayStore Link
- AppleStore Link

YAKSPORT

Yaksport is a Denmark-based platform that helps sports teams streamline travel by booking hotels, managing flights, and sending leads, with easy lead contract signing for seamless organization.

CROWN KEBAB SSK

The Self- Service Kiosk (SSK) is an application operating in Denmark, allowing users to conveniently place orders from a tablet located within the restaurant.
PlayStore Link

GUARDIAN WATCH

The I developed the Guardian Watch app, enabling managers to track employees' real- time locations via Google Maps, Geo Location, and Firestore. Employees can log in and permit background tracking, even when the app is closed.

JURRI

We developed Jurri, an app that combines email management, file storage, and password security. It lets users send and receive Gmail, organize folders and files, and securely store passwords.
Website Link

BYTE TRANSLATE

We developed ByteTranslate, a tool that lets clients add and manage translations for their projects. It supports multiple languages and has an easyto- use interface for clients to input and update translations.
Website Link

STEAM BOILER SIMULATOR

I made a Steam Boiler Simulator app using React Native (Expo). It's made for factories and helps train staff on managing steam boilers. You can see real-time data like pressure and temperature, adjust settings, and learn about safety protocols.

TEXT SCANNER

I created a Text Scanner application equipped with image recognition features, enabling users to extract text from images taken with the camera or chosen from the device's gallery.

ONLINE STORE

An online grocery store for Denmark, making it easy to shop for fresh food and household items with great service.
